## DETAILED ACTION

### *Remarks*

1. Applicant's cancellation to claims 24, 25, 28-31, 34-35 and 37-40 is acknowledged. Thus, claims 1-23, 26, 27, 32, 33 and 36 are pending in the application.
2. The objection to specification and to claim 20 is withdrawn.
3. All the rejections, as set forth in the previous Office Action, are still sustained.

### *Response to Amendment*

4. The amendment filed 11/19/03 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "wherein said layer of passivation is not photoresist." Applicant is required to **cancel** the new matter in the reply to this Office Action.
5. Applicant's arguments filed 11/19/03 have been fully considered but they are not persuasive.

Applicant's argument is on the ground that the mask layer 37 in Lin (US 6,426,556) is not a passivation material, but a photoresist layer.

In response to the argument, although mask layer 37 is called "photoresist", it also acts as a passivation material as to partially removing said contact pad 24 because mask 37 is passivating the remaining portion of the contact pad 24 that are covered by the mask 37 while in the step of partially removing.

In fact, the originally filed specification did **not** teach or suggest what the passivation material is. For example, on pages 15, 19, 25, 28, 29, 35, 39, it merely teaches that a layer of passivation 32 has been deposited over the surface of the layer 29 of dielectric.

Accordingly, the teachings of Lin still read on the claims.
